

Active Components™

Lower Storage

PRODUCT SHEET

Bring organization and personalization to the workspace, while supporting diverse workstyles. Active Components lower storage makes use of vertical space to provide unique and adaptable solutions that keep materials, tools, and personal items handy, off the floor, and out of the way.

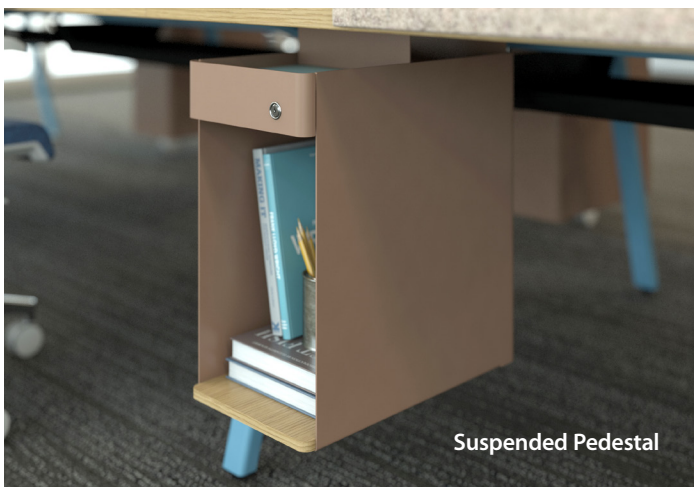

Why Active Components?

Open and light in scale, the Active Components product line is a set of inviting accessory and furniture elements that draws people in with a sense of improvisation and energy. Through integration with Haworth's product portfolio, Active Components helps improve efficiency in compact footprints with products that support user performance, posture changes, memory cues, collaboration, and focus work.

Lower Storage Features

Active Components lower storage offers a variety of adaptable solutions to make open floorplans and smaller workspaces more personal, comfortable, and efficient.

- **Security Drawer** – Offers a secure place to charge and lock up items such as cell phones and tablets.
- **Suspended Pedestal** – Appropriately scaled to support active storage for today's needs in a smaller footprint, with the option to layer accessories inside and outside the unit.
- **Floating Shelves** – Creates a horizontally stacked display area to support memory cues and optimize vertical space in smaller footprints.
- **Accessories** – Customize the work environment with drawer liners, trays, file dividers, magnetic dividers, and personal storage hooks.
- **Suspended Ender** – Provides active storage for personal items and shared reference materials in compact footprints, while creating a barrier to increase visual privacy.

Statement of Line

The Active Components product line includes upper and lower storage, Side Car worksurface/storage units, screens, worksurfaces, and legs that can all be integrated with other Haworth product lines.
