Away from the Desk

A dynamic & extensive
upholstery system

Product Description

Away from the Desk (AftD) is a soft upholstery system designed to answer the rapidly changing needs of the workplace as we migrate away from personal desks with their fixed and tethered technology towards shared, collaborative spaces and furniture.

AftD answers the need for more diverse configurations for both personal work and teamwork. Multiple specification options – for individual use, or for two, four or six people – can be further configured with larger, more open and more inclusive collaborative working configurations at lounge, table or café height.

AftD's high back design provides refined acoustic and visual privacy, and offers an upright, ergonomically controlled seating position more reflective of a task seat posture. It also provides multiple specification options for large and small work surfaces, and can meet a wide variety of power, data and monitor requirements.

With the help of our clients, their designers and specifiers, AftD is helping to transform office environments and working practices. And, just as the 'Hoover' brand gave birth to the verb 'to hoover' (though we wouldn't dare to go as far as comparing their stories!), AftD has become an industry archetype, used as a verb to describe being able to work increasingly away from the desk.

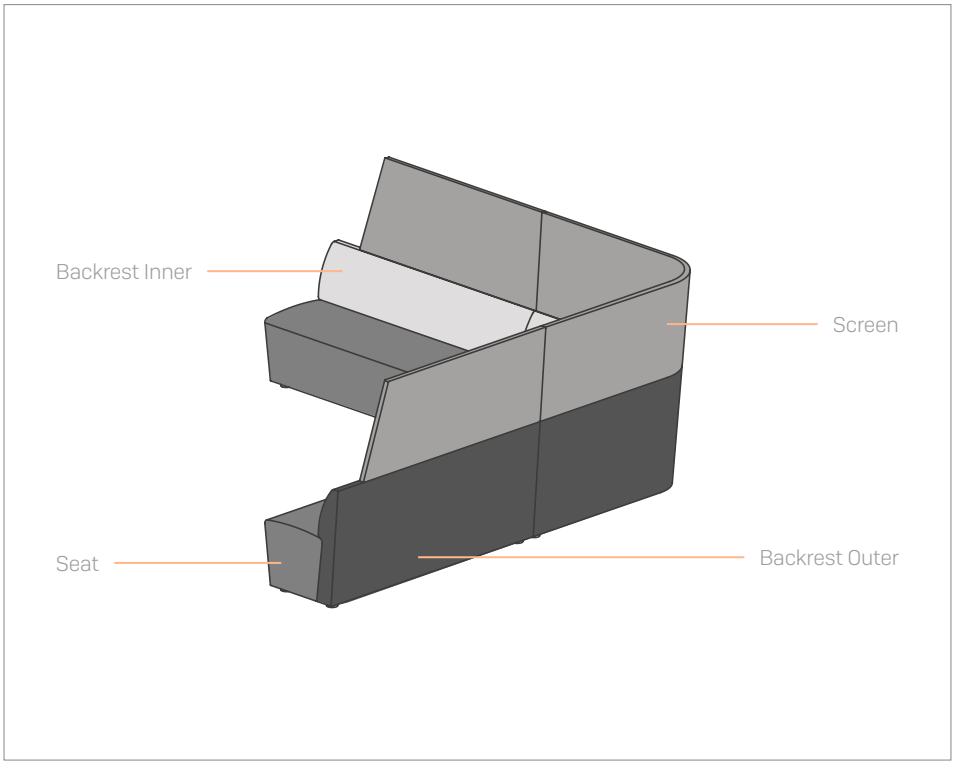
Fabric Selection

Modular Units

Modular seating units have up to 4 upholstery choices.

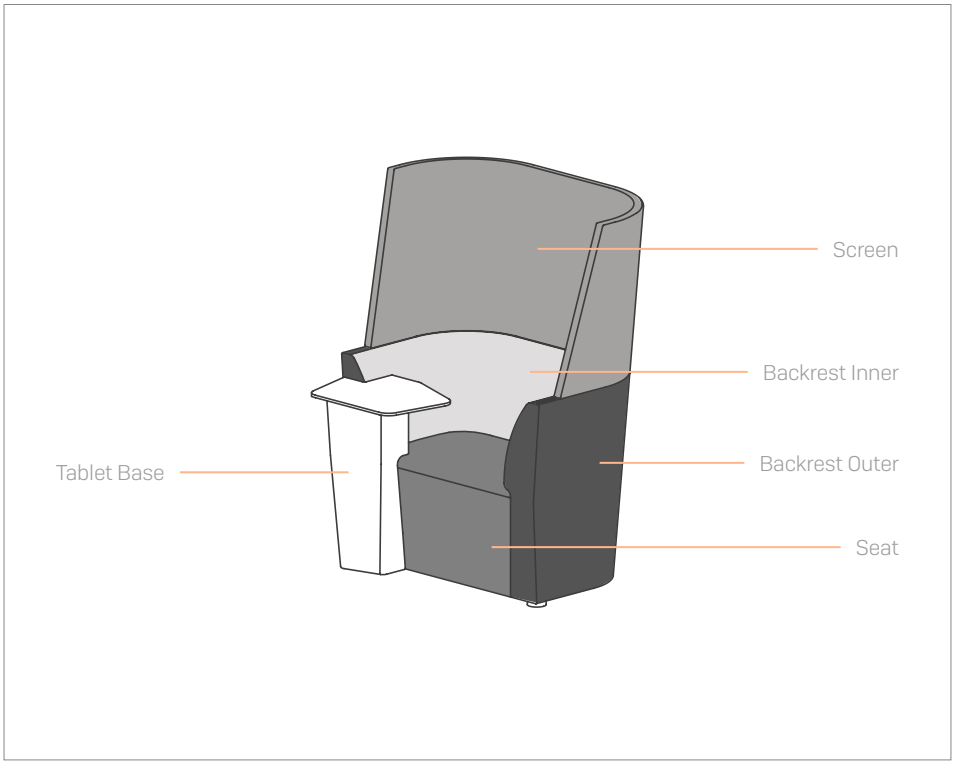
These choices are stated in the diagram opposite.



Detached Seating

As with the modular units above, the main body of the detached seating is split into 5 upholstery choices.

Some stand alone seating units have the addition of an integrated tablet base as a separate upholstery choice.



Fabric Selection

Striped, patterned or plaid fabrics are only available for specification on the seat or backrest inner portions as illustrated below.

When selecting fabrics with regular patterns for Away from the Desk, panels will be cut by hand to ensure the pattern matching is as accurate as possible. This is due to the fabrics tendency to wrap as it is upholstered across a curved surface.
