# Parking & Saving Space

## Classic Locker

### Personal and secure

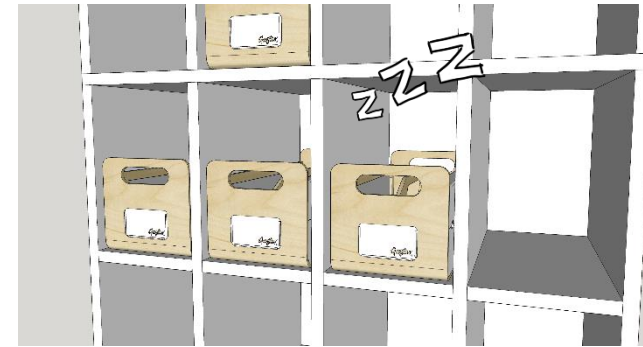

Gustav loves lockers. The minimum required internal locker dimensions are: (L) 410x(W) 180x(H) 250mm

## Secure Garage

### Secure, shared and a space saver

Gustav Garage is 2.5 times more space efficient than traditional lockers. It allows users to store Gustav in different locations.

## Casual Parking

### Cost effective, shared and a space saver

A very cost and space efficient solution. Simply park Gustav, fast and easy.

# Design

*Gustav*

**Friendly.** Combining the warmth of real wood with minimalistic white elements gives Gustav its friendly look - a welcome contrast to many traditional office environments.

**Lightweight.** Only 1265g for easy transport. Optimised construction method (plywood bending & aluminum) to ensure lightness and durability

**Handy.** Compartments are easily accessible, designed around the size of the human hand.

**As small as possible,** but big enough to fit all essential tools and belongings. The product size is optimised so Gustav fits easily in a standard locker.
