U.R
Smart Design Meets Sustainability

U.R is an environmentally considered table system designed for flexibility, functionality, and sustainability. Offering a complete family of table options, U.R ensures continuity of design across any commercial environment—from boardrooms and training spaces to collaborative work areas.

Every element of U.R is engineered with the environment in mind. Life Cycle Assessments guided material selection, while advanced techniques such as Finite Element Analysis were used to create strong, efficient components like die-cast aluminium frames without unnecessary waste. U.R is designed for 100% disassembly, making recycling simple and effective.

The U.R folding table adds unmatched adaptability with a tilt-top stacking design, lockable soft tread castors, and integrated linking mechanisms as standard—perfect for dynamic workplaces that demand smart, sustainable solutions.

Warranty
- 10 Years

Materials and finishes
- **Frame:** Chrome, Black, Powdercoat, Custom Powder Coat
- **Top:** Made to customer specification
