

## Pera Lounge Chair

Minimalist Comfort, Maximum Style

The Pera Lounge is a premium, commercial-grade occasional lounge chair designed for durability and contemporary style. Built on a robust metal structure with integrated steel springs, the chair is molded in high-density polyurethane foam to deliver exceptional comfort and long-lasting performance. Its sleek, minimalist form makes it an ideal choice for modern interiors.

Available in two configurations—with arms or without arms—the Pera Lounge offers flexibility to suit any space. Choose between two metal base options: a sophisticated swivel base or a streamlined sled base, both engineered for easy disassembly to simplify transport and logistics.

For added customization, optional painted finishes for the chair frame are available as an indent order.
