

C.ME Monitor Arm System

Flexibility Meets Modern Style

The C.ME Monitor Arm System is the perfect blend of functionality and design, created to enhance your workspace with effortless adjustability and clean aesthetics. Designed by Thinking Works Design Studio, C.ME focuses on user-friendly operation, environmental responsibility, and sleek styling.

Available in single, dual, triple, or quad arm configurations, and in two modern colour options—white or black—C.ME adapts to any setup. Its safe push-button mechanism allows easy height adjustment from a seated position, while the quick-release feature and 90° portrait-to-landscape rotation provide ultimate flexibility.

Discreet cable management keeps your desk organized, and both bolt-through and desk clamp mounting options are included as standard for secure installation.
