

## Lovoc Screen

Modular. Sustainable. Smart Design.

Lovoc is a modular workstation screen designed with sustainability at its core. Every detail considers the entire product lifecycle—from manufacturing to end-of-life recycling. Our patented process eliminates stitching and minimizes glue usage, making disassembly simple and ensuring all raw materials can be recycled.

This innovative approach results in an environmentally responsible product with very low VOC emissions, promoting healthier workspaces. Lovoc screens are flat-packed for efficient transportation, reducing carbon footprint even further.

For upholstery, we recommend Woven Image's GLOBAL fabric, Warwick FOSTER, and Warwick BROOKLYN ranges. These fabrics allow us to eliminate PU foam backing and reduce adhesive use by 97% compared to traditional screens. GLOBAL is Low-VOC Certified and available in 25 colours, offering sustainable style without compromise.

### Key Features

- Modular design for flexible workstation layouts
- Patented process for minimal glue and stitching
- Easy disassembly for recycling
- Very low VOC emissions
- Flat-packed for reduced transport impact
- Recommended fabrics: GLOBAL (25 colours), FOSTER, BROOKLYN
- Eliminates 97% of adhesive compared to traditional screens
