

Refresh Q-Pod 3.0

A private four-person meeting space for the open-plan office

- *Acoustic shell that works both ways.* The shell is made from 100% recyclable polyester that absorbs sound on both sides, so people inside can speak freely and the floor outside stays calm.
- *A table that keeps you powered.* The integrated meeting table includes CE-certified power and fast USB-A and USB-C charging, so laptops and phones stay topped up through the longest session.
- *Clean, filtered air.* A HEPA filter keeps the air inside fresh, with steady airflow that stays comfortable even when the pod is full.
- *Energy use that looks after itself.* A motion sensor runs the lighting and ventilation only when the pod is in use, switching everything off after five minutes of inactivity.
- *Control at your fingertips.* An intuitive touch panel puts lighting and ventilation within easy reach, so the space is ready the moment you step in.
