

Quiet Revolution

Free up meeting space with Quiet Revolution

Quiet Revolution is ideal for open plan and activity based working environments. Unlike fixed workspace areas, these moveable units do not require individual fire and air-conditioning compliance and can move with you to future locations. It provides privacy and a place to focus, enhancing staff well-being and productivity.

Quiet Revolution features mid-frequency acoustic dampening qualities. These assist in the reduction of ambient sound when the unit is in use. Its height and size make it a useful piece of furniture for sound absorption when not in use.

Dimensions

Height	1800mm
Diameter	1250mm
