

Gustav

Your little friend in the office

Gustav allows workers to carry their work space with them wherever they go, or store it in a locker or shelf in their shared office space.

The laptop stand allows an ergonomically correct posture in a number of different environments, meaning that Gustav doesn't just help move between spaces, but allows a worker to easily mould to any environment in which they are working.

The real wood finish and curved corners gives Gustav a friendly feel, while the simple minimalist, design invites personalisation, with room for photos, personal notes and storage of personal belongings alongside work items.
