

Portable work spaces that move as fast as you do.

Forum Pods are a meeting space that assembles in 1-2 days. No cutting, no painting, no building. Minimal disruption, and you can take it with you.

To get your imagination going we've started with five standard modules.

- **BOUNCE** A semi-enclosed lounge environment. A meeting space for 4 people.
- **BRIEF 3+1** Visually open from one side. A 4-6-person meeting room.
- **BRIEF 2+2** Visually open on both sides. A 4-6-person meeting room.
- **BRIEF + A BIT** Visually open on both sides. An enclosed 4 - 6 person meeting space PLUS an additional alcove space for informal meetings, utility zone or a small kitchenette.
- **BREAK + OUT or TAKE ONE** An enclosed meeting space or office plus a semi enclosed breakout space for informal gatherings.

Forum Pods are designed to work with the existing air provision in the surrounding space and do not need additional air supply. The ceiling baffles do not restrict air movement from fit out ceiling diffusers.

The construction is a box frame structure with infill panels either glazed or solid. The ceiling is designed with a permanently open louvre system utilising a series of vertical acoustic baffles. The Pods comes complete with LED strip lights including remote control dimming.

Dimensions

BOUNCE

2380h x 2250w x 2050d mm

BRIEF 3+1

2380h x 3600w x 3000d mm
