

Autex Vicinity Desk Screens

Elegant, lightweight desk screens

Vicinity Desk Screens are truly acoustic, absorbing sound across the frequency spectrum. This allows distracting chatter and background noise to be controlled at the source, supporting the overall acoustic balance of your space.

With eight sleek design options, and a range of contemporary colours, Vicinity Desk Screens will effortlessly complement any workspace.

Vicinity Desk Screens are made from compressed 100% polyester felt and do not contain formaldehyde, crystalline silica, or other carcinogens.

Vicinity Screens are available flat or pressed. Flat screens offer classic, understated design with simple contemporary shapes and a smooth finish. Pressed screens have a softer, more sophisticated look with sleek, rounded edges and a minimalist embossed design.
