Autex Cascade Screens

Acoustic hanging screens that create calm amongst chaos

Cascade Hanging Screens are made using a lightweight semi-rigid acoustic panel with water-cut patterns allowing line of sight to remain, but with a visual sense of division. A fixed or suspended acoustic partition system, improving your internal environment by lowering reverberation and background chatter.

Cascade's patented designs of Folding and Expanding screens pull and push apart to create a pattern without any cut out pieces going to waste. This allows half the material to go twice the distance, continuing a commitment to push innovation while being mindful of the environment.

Cascade is low VOC, non-toxic, non-irritant and non-allergenic and contains no Red List chemicals so you know it's safe and great for indoor environmental quality.

- A feature element or a subtle backdrop
- Create breakout zones in large open plan areas
- Create the feel of privacy in open-plan areas

Dimensions

Height	2400mm
Width	1200mm
Thickness	12mm
