

GoSleep Recovery Pod

Rest, sleep and recover.

The pod's design is streamlined and timeless, which means that it blends well into different environments. The pod's sides can be customised with branding and messaging. GoSleep Recovery Pods are easy to relocate, and the product is plug and play.

Simply enter the pod and slide down the privacy cover, creating a fully closed, private space.

Breatheable material and natural air ventilation, means the air inside the pod is as fresh as the air outside. The perforated privacy cover provides a subtle translucent effect, making the space pleasantly dim. The cover is not see-through: people on the outside cannot see inside the pod.

At the foot of the pod, there is a storage space for your personal belongings and the space is designed to fit a carry-on luggage. The pod's cover is opened and closed manually by hand, and it cannot be locked – it is not possible to get stuck inside. The pod is equipped with a USB port – charge while you recharge.

Dimensions

Height	1180 mm
Width	1000 mm
Length	2270 mm
Weight	185 kgs

Warranty

- 5 Year warranty

Specifications

- Steel frame
- Birch plywood walls
